

### 1492-IFM40D120-2

LED Indicating 120V AC LEDs and Extra Terminals for Outputs

#### Application Notes

1. **Compatibility** — To ensure proper operation with the I/O module, do **not** exceed the voltage and current ratings of the IFM. When this IFM is used with a hard contact (relay) output circuit that switches an inductive load, surge suppression must be used (e.g., an MOV wired across an AC load).
2. **Wiring** — Refer to the Label Section on page 174. For Field-Side Wiring Diagrams, refer to the Wiring System web site information on page 200.
3. **Isolation** — The power bus and LEDs are isolated into four groups of 10 terminals (eight LEDs). This allows each group of output devices to reference a different power source.
4. **Dimensions** — Refer to page 173.

#### Pinout
