## 140 new heavy-duty on-road, off-road-usable filter products

Since last June this manufacturer has introduced 140 new filtration products for on-road and off-road uses.

Among the heavy-duty-designed line are 64 fuel filters, 31 air filters, 24 hydraulic filters, 17 lube filters, three coolant filters, and a gasket kit. Beyond traditional customer communication, this company helps you check its updated New Product list frequently at its website (available when you click the number below, then click Luber-finer's name). You can also search filtration products via mobile site and parts look-up tool.

## Photosensitive anodized aluminum identification products

Harsh onshore and offshore drilling-applicable photosensitive anodized aluminum identification products highlight this free spec sheet.

Durable nameplate, barcode label, service schematic, and control panel images are permanently sealed beneath a sapphire-hard anodic layer. This makes them all but impervious to chemicals, heat, abrasion, salt spray, and UV, notes the illustrated spec sheet.

Metalphoto benefits and durability are cited to produce lasting readability for regulatory, financial, and maintenance compliance. Specific applications are cited to include calibration tags, chemical/salt spray-resistant barcode labels, or custom machine control panels.

## Temporary light, power for facility maintenance, repair

Forty-four free, illustrated pages of temporary lighting and power products comprise this new catalog. With emphasis on safety and functionality, such products as Quad Light temporary lighting systems are presented for facility maintenance and repair work. Among major catalog sections are remote-control spotlights, hazardous location lighting for Class 1, Div. 1, work lights, as well as a complete line of retractable cord reels.

## Analyzer tests for fuel tampering

Nemesis Analyzer is developed as the "first" fully portable, lightweight, rugged system to test for fuel tampering. It delivers rapid sample analysis with marker detection to very low levels to detect covert markers in fuel samples. Nemesis is designed to help avoid fuel adulteration, substitution, and smuggling, declares its developer — who offers complete free additional data.

## New heavy-duty vehicle antifreeze/coolant products

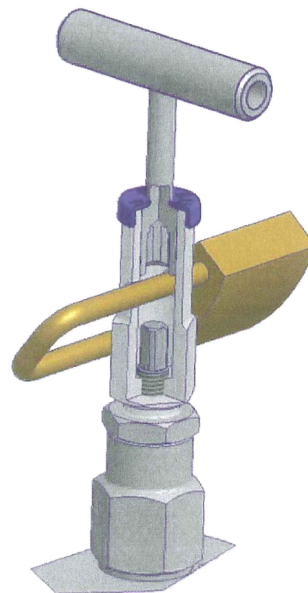

Prestone Command heavy-duty antifreeze/coolant products are newly introduced for the North American heavy-duty vehicle market.

Two patented Prestone Command formulations are offered: **Extended Life** provides 600,000-mile/12,000-hr CAT EC-1 protection for any diesel-powered heavy-duty engine. It protects aluminum and all other engine metals against temperature extremes, rust, corrosion, scale, and water-pump failures. Its compatible with any other heavy-duty antifreeze/coolant.

**Extended Service** is SCA pre-charged. It provides advance protection from freezing, overheating, cavitation erosion, corrosion, scale, and foaming in any heavy-duty engine with need-release filter technology that is used in normal to severe-duty cycles and extreme temperature conditions. Full Command data are yours free.

**Prestone Products Corporation**  
1900 West Field Court 1E-433, Lake Forest IL 60045

## Three lockable valve head units

Lockable anti-tamper, locking plate, and AT (anti-tamper) -Key lock (shown) valve head units are available.

All three options are offered to protect your equipment against unauthorized or unintentional valve operation. AT-Key valves operate by a T bar which is an integral component of the valve. Lockable version is standard for all valve head units. Locking plate is used when a valve is operated by T-handle instead of T bar key and space is limited.

Complete lockable valve options details are free.
