

Armaturenfabrik Franz Schneider GmbH + Co. KG

The family-run company AS-Schneider, founded in 1875, with approx. 350 employees, is one of the global leading manufacturers of Instrumentation Valves and Manifolds. The company shapes this branch with technological diversity and many innovations. AS-Schneider is the world market leader in the niche of Valves for Large Diesel Engines.

Industrial valves which have been developed, designed and produced by AS-Schneider can be found in plants all over the world, as well as in the oil and gas industry. In Upstream, the company's products can be found in onshore and offshore production, in midstream they are used in transportation, storage and natural gas compression, and in downstream in refineries and the petrochemical industry. In the chemical industry, AS-Schneider valves can be found in conventional power plants, nuclear power plants and FGD. Seawater desalination plants, waste incineration plants and steel mills are also among their customers.

The combination of skilled professionals, advanced manufacturing processes and highly automated production systems allows AS-Schneider to achieve a consistent high level of quality, durability and efficiency. The company has received all internationally relevant certificates. At AS-Schneider quality assurance starts at material procurement. Continuous quality control performed at the company's own

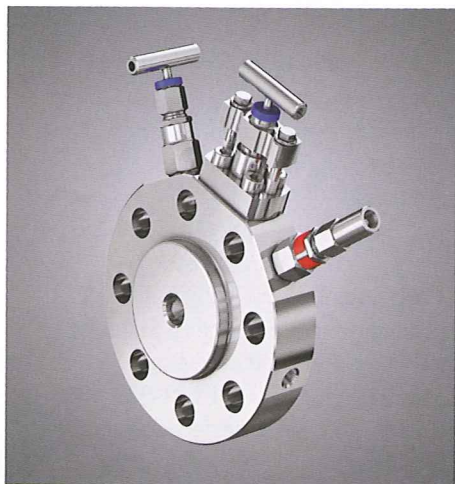

testing laboratory safeguards compliance with the highest standards and the long-term reliability of the valves.

A broad production range combined with extreme flexibility ensures that AS-Schneider can handle any and all requirements in-house. Fast conversion of the manufacturing facility allows cost-effective serial production and the timely and high quality production of customer-specific orders.

AS-Schneider not only believes in technological progress, but also in working in close relation to the customers. Detailed updates apply as a matter of course, from design to final fitting. One of the company's strengths is that they offer the customer state of the art tailor-made valve portfolios – before, during and after finalizing the project. With an international network of subsidiaries and partners, AS-Schneider is locally represented throughout the world. Thanks to the long tenure of their employees, the

company can offer permanently trusted partners for their customers to work with. AS-Schneider believes that in order for a project to be successful continual communication, competence and mutual trust are an important basis. The skilled and highly qualified AS-Schneider team not only enables the successful completion of projects, but also allows the daily use and bundling of their comprehensive knowledge and wealth of experience.
