

**Honeywell**

**The Average Person  
Breathes 3,400 Gallons  
of Air Each Day\***

**WHAT ARE YOU BREATHING IN?**

**When you breathe**, air isn't all you're inhaling. Mold spores, pollen, bacteria, dust and other particles exist in virtually all indoor air.

When installed into your home's heating and cooling system, a Honeywell Whole-House Air Cleaner traps and filters airborne particles and contaminants passing through the duct system to make sure that cleaner air is distributed to all rooms within your home.

A Honeywell Whole-House Air Cleaner can also help maintain the performance of your furnace and air conditioner.

Get the benefits of a Whole-House solution for improving the air in your home.
