

The Damper Difference

Standard features of Honeywell Dampers

Honeywell

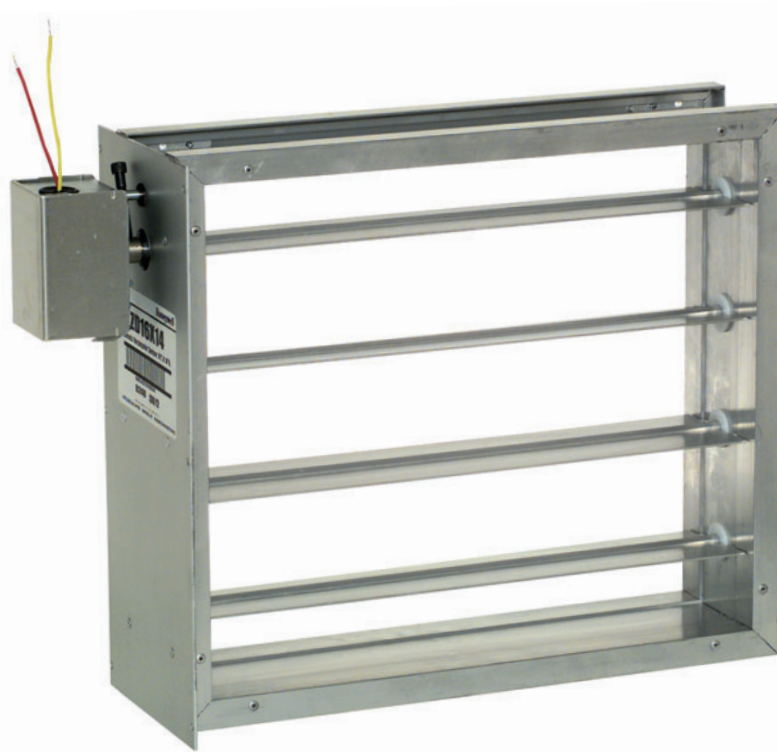

Honeywell dampers offer the highest quality workmanship and unparalleled performance. Every Honeywell damper is built for installation flexibility, reliability and reduced callbacks. The enhanced design provides longer and quieter operation over the life span of the damper. With over 100 size options in both rectangular and round configurations, Honeywell has a damper available for virtually every zoning application. Rounding out the portfolio are both barometric and modulating bypass damper models.

The Damper Difference

**ONLY HONEYWELL USES
2 PIECE BUSHINGS**

- **Quieter, longer life**
 - Cylolac™ and Nylon bushings eliminate squeaking noise caused with traditional bushings and extends motor actuator life
 - Zero field issues
- **Proven performance, tested at real-life extremes**
 - 259,000 cycles (+12-year life)
 - 75°-140° Fahrenheit
 - 20%-80% humidity
 - +/- Dust (major noise contributor)

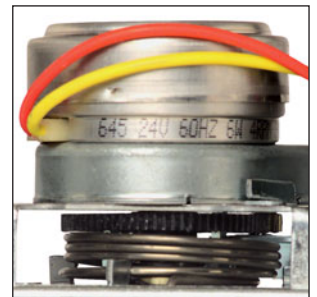

**THE HONEYWELL
ADVANTAGE**

- **One brand matched system**
 - Honeywell panels and dampers
- **Honeywell Brand: 96% homeowner recognition**
- **Contractor PRO™ members earn back 9-12 points (\$9-\$12 per zone system) on average**
- **Direct shipment to contractor job sites**
- **Dedicated toll-free zoning hotline
1-800-TAT-TEMP
(800-828-8367)**
- **5-Year Warranty**

ENGINEERING EXCELLENCE

- **4 rivets in each corner, coupled with corner angle reinforcement brackets**
 - Rigid, strong, won't twist if duct not straight
- **Extruded lip minimizes leakage**
- **Damper size labeled on damper face**
 - Multiple sizes (5"-20" round options; 125 rectangular configurations)
 - Tight, accurate fit inside ductwork
- **Gears built with Dupont™ Kevlar® fiber**
- **2 wire dampers**
 - Easier/faster install time
 - Cannot mis-wire
- **Power closed, spring open**
 - In the event of a power failure, damper will stay in the open position
- **Motor set screw now attached with twice the torque for superior reliability**
- **Adjustable range stops**
- **Reliable mechanical position indicator**
