

# DON'T MISS A PRIMARY OPPORTUNITY

Using an interrupted oil primary can save you service costs. Honeywell's R7184 interrupted oil primary gives you a headstart with the exclusive features you expect from the industry leader. The primary's *Pump Priming Cycle* simplifies the purging process and saves you time. And using our patented *Cad Cell Resistance Check*, you'll always know you have a strong flame signal before you leave the job.

Honeywell. A time-honored name in the oil heating industry. Powerful enough to offer a series of innovative products that help you service and retain customers—today and tomorrow. So you need never miss an opportunity.

*Honeywell.*  
*Investing in the future of oil heating.*
