

Say “Goodbye keyboard” and “Hello touchscreen” with the new Honeywell Reveal™ touchscreen display.

High-definition not only describes the display, it also describes the control possibilities. Reveal provides real-time status information for everything from comfort setpoints to alarm data to system performance. Small enough for easy mounting in even the tiniest equipment room, Reveal, built on the Niagara<sup>AX</sup> Framework®, interfaces seamlessly with all WEBS-AX controllers and makes information accessible from all systems connected to these controllers.

## A Simple Touch

Reveal literally puts system access right at your fingertips for easy access to parameters, monitoring status, setpoint adjustments, alarms and overrides.

- High-definition, full-color LCD display with touch screen interface
- Sharp, color display makes it easy to differentiate alarms
- Easy, efficient data access
- Select from up to 5,000 screen elements, navigation elements and data points to display or modify
- Monitor system status and alarms
- Instant access to setpoint changes and overrides
- Can be updated via USB drive or using remote download
- Access to setpoints and device settings are password protected
- Screens can be customized to display the desired information

### INFO WHERE YOU WANT IT

Forget the need for a dedicated workstation or a clunky interface taking up valuable space. Honeywell Reveal is as unobtrusive as any standard wall thermostat and can be placed wherever you want it for easy access to information at any time.

- Compact size for easy mounting on any standard 2" x 4" electrical box
- Attractive design with high-definition screen looks great in any space
- Select the right model for the desired application, including an extended temperature option for use in extreme conditions, such as rooftops and walk-in cold rooms:
  - Color model: 14° to 122° F (-10° to 50° C)
  - Grayscale model: -4° to 158° F (-16° to 70° C)
- Devices can be networked throughout a facility for easy access from any location
- Automatic network time synchronization

### AVAILABLE NOW

Use Reveal now to gain easy access to more information more quickly.

OS NUMBER	DESCRIPTION
LCD-CT043A100	4.3-inch High-Definition Color Display
