

Combining the new Honeywell Zelix™ Sylk®-enabled actuator with JADE™ economizers takes installation and checkout of economizer control to a new level.

The only communicating actuator to work with JADE, Zelix Sylk-enabled actuators decrease installation time and provide the user with valuable operational information. You'll save your customers money — and because Zelix Sylk-enabled actuators install quickly, you'll save time and money for your business, too.

Intelligent Control

Just as JADE™ brought economizer efficiency to small- to mid-sized buildings, the Zelix™ communicating actuator simplifies diagnostics and troubleshooting in a JADE economizer system. From increased system information to reduced installation time, it has plenty to offer both you and your customers.

ENHANCED CONTROL

The efficiency of communicating devices delivers real savings your customers will quickly note on their energy bills. The Zelix Sylk®-enabled actuator works with JADE to provide improved control, field detection and diagnostics.

INSTALLATION SAVINGS

Less time, more user feedback and easier connection — it all adds up to higher profits per job.

- **Reduced Wiring Complexity** — Polarity insensitive wiring keeps installation simple and fast.
- **Reduced Checkout/Inspection Time** — 1/3 the time of previous models.
- **Operates in Test Mode** — Save time during setup and testing.
- **Status Display** — For installation, troubleshooting and ongoing operation, the Zelix Sylk enabled actuator provides real-time status information so you can monitor stalls, over/under voltage and more.
- **Self-Centering Shaft Adaptor** — The self-centering shaft adaptor grabs the shaft with a single screw turn, so you'll never need to waste time with U-bolts again.
- **Wiring Access Cover** — Another Honeywell exclusive, the wiring access cover eliminates the need to use a junction box to save wiring material and installation time.

PART OF THE TRUSTED ZELIX FAMILY

From day one, Honeywell Zelix actuators have been popular because of their combination of compact size and powerful torque. The Zelix Sylk-enabled actuator is the latest addition to the Zelix lineup, and is the first communicating actuator to work with JADE. Count on the Zelix Sylk-enabled actuator to deliver the same reliable, effective operation you've come to expect from Honeywell Zelix actuators.

ORDERING INFORMATION

Model Number	Model Number (including 3 ft. whip)	Torque	Voltage	VA Driving ¹	Drive ² (sec)	Control Input/Output Description	SPDT Aux Switch	
MS3103J1030		27 lb-in (3 Nm)	24 Vac/dc	6/3	90	Sylk Enabled	0	
MS7403A2030						Floating, Modulating ³ , Three-Position, Feedback	0	
MS7503A2030						Floating, Modulating ⁴ , and Feedback	0	
MS7503A2130						Floating, Modulating ³ , and Feedback	1	
MS8103A1030					45	Two-Position (SPST)	0	
MS8103A1130			1					
MS4103A1030			100-250 Vac	6/9	45	Two-Position (SPST)	0	
MS4103A1130						1		
MS3105J3030			44 lb-in (5 Nm)	24 Vac/dc	6/3	90	Sylk Enabled (5 addresses & Analog Output)	0
MS3105J3130							Sylk Enabled (5 addresses & Analog Output)	1
MS7405A2030		Floating, Modulating ³ , Three-Position, Feedback					0	
MS7505A2030	MS7505W2030	Floating, Modulating ⁴ , and Feedback					0	
MS7505A2130	MS7505W2130	Floating, Modulating ³ , and Feedback					1	
MS8105A1030	45	Two-Position (SPST)				0		
MS8105A1130		MS8105W1130				1		
MS4105A1030	100-250 Vac	6/9				45	Two-Position (SPST)	0
MS4105A1130							1	

¹Number represents range

²All spring return actuators have <25 second spring return time

³2-10 Vdc

⁴0/2-10 Vdc
