

Reflection light scanner

MLV13-8-LAS-120/30/40b/73c

with 4-pin, M12 connector

 ϵ

- Laser class 2, eyesafe
- Pre-fault indication
- Control input for light-/dark switching
- Protection degree IP67

General specifications

Detection range 0 ... 120 mm , adjustable
Light source laser diode Red light 670 nm

Approvals CE Laser class 2

Reference target 10 mm 10 mm Light type red, modulated light

Ambient light limit 10000 Lux, 7500 Lux halogen light

Hysteresis H < 15 %

Indicators/operating means

Function display switching state: LED yellow pre-fault indicator: LED red

Operating elements sensitivity adjuster

Electrical specifications

Operating voltage 10 ... 30 V DC Ripple 10 % No-load supply current I_0 \leq 16 mA Time delay before availability t_v \leq 30 ms

Input

Control input Light ON: +UB Dark ON: 0 V

Output

Switching type light/dark switching

Signal output 1 NPN output, short-circuit proof, protected from reverse polarity, open collector

 $\begin{array}{lll} \text{Switching voltage} & \text{max. 30 V DC} \\ \text{Switching current} & \text{max. 200 mA} \\ \text{Voltage drop} & \text{U}_d & \leq 2.5 \text{ V DC} \\ \text{Switching frequency} & \text{f} & \leq 500 \text{ Hz} \\ \text{Response time} & \leq 1 \text{ ms} \\ \end{array}$

Standard conformity

Standards EN 60947-5-2

Ambient conditions

Ambient temperature $-10 \dots 45 \,^{\circ}\text{C} \, (263 \dots 318 \, \text{K})$ Storage temperature $-40 \dots 70 \,^{\circ}\text{C} \, (233 \dots 343 \, \text{K})$

Mechanical specifications

Protection degree IP67

Connection M12 connector, 4-pin

Material

Housing ABS

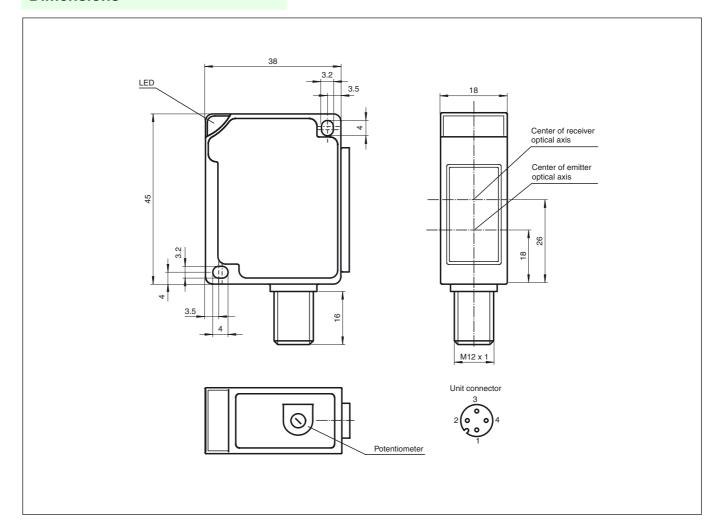

Optical face scratch resistant plastic lens

Mass 40 g

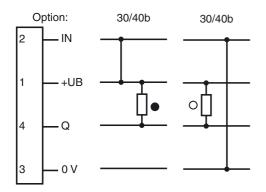

MLV13-8-LAS-120/30/40b/73c

Dimensions

Electrical connection

Additional Information

Conventional use:

The reflex light scanner contains the emitter and receiver in a single housing. The light from transmitter is beamed back from the recorded object is evaluated by the receiver. The detection range depend on the object colour. With dark or very small objects the detection range reduces.

Mounting instructions:

The sensor can be fastened over the through-holes directly or with the included mounting bracket.

The base surface must be flat to avoid distorting the housing during mounting. It is advisable to secure the bolts and screws with washers so that the sensor does not become misaligned.

Instructions for adjustment:

Adjust the sensor on the background. If the yellow LED illuminates, the detection range needs to be reduced with the detection range adjuster, until the yellow LED goes off.

Object detection check:

Position the object into the light beam. Position light spot on object. If the object is detected, the yellow LED illuminated. If it does not light up, further to adjust the detection range with the potentiometer, until the yellow LED lights up.

The red LED flashes if reception deteriorates (e.g. soiled lenses or by maladjustment) and when falling short of the stability control.

lustration:

We recommend that you clean the optical interfaces and check the plug-in connections and screw connections at regular intervals.
