

**Features**

- 1-channel signal conditioner
- AC/DC wide range supply
- 2-wire transmitters or current sources
- Output 0/4 mA ... 20 mA
- 2 relay contact outputs
- Programmable high/low alarm
- Configurable by **PACTware™** or keypad
- Line fault detection (LFD)
- Up to SIL2 acc. to IEC 61508

**Function**

This isolated signal conditioner is used in non hazardous area applications. It is suitable for a variety of measuring tasks.

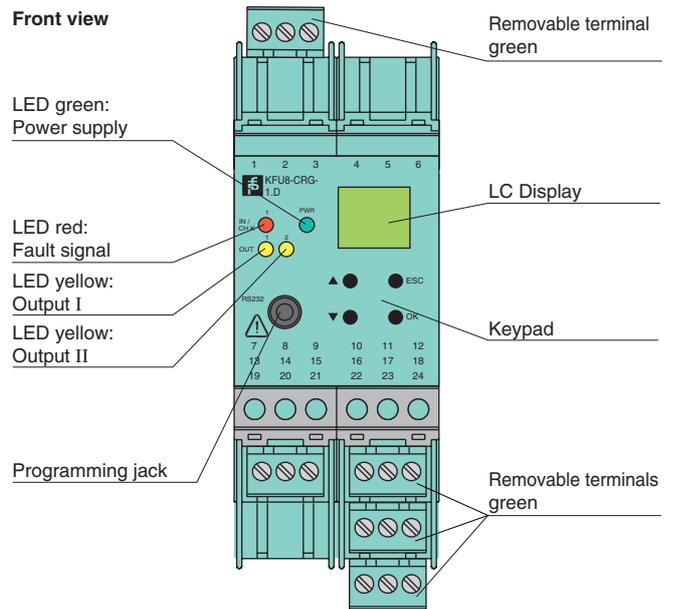

Active power supplies as well as 2-wire transmitters can be connected. Two relays and an active 0/4 mA ... 20 mA current source are available as outputs.

The relay contacts and the current output can be integrated in security-relevant circuits. The trip values of the relays are derived from the transmitter signal or the signal of a connected power source. The current output is easily scaled. The input has lead breakage and short circuit monitoring.

The unit is easily programmed by the use of a keypad located on the front of the unit or with the **PACTware™** configuration software.
