Inductive proximity switches

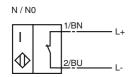

Comfort series 15 mm not embeddable

€ 0102

General specifications	
Switching element function	NAMUR NC
Rated operating distance sn	15 mm
Installation	not embeddable
Assured operating distance sa	0 12.15 mm
Reduction factor r _{Al}	0.4
Reduction factor r _{Cu}	0.3
Reduction factor r _{V2A}	0.85
Nominal ratings	
Nominal voltage U _o	8 V
Switching frequency f	0 100 Hz
Current consumption	
Measuring plate not detected	\geq 3 mA
Measuring plate detected	≤ 1 mA
Standard conformity	
EMC in accordance with	IEC / EN 60947-5-2:2004
Standards	DIN EN 60947-5-6 (NAMUR)
Ambient conditions	
Ambient temperature	-25 100 °C (248 373 K)
Mechanical specifications	
Connection type	terminal compartment
Core cross-section	up to 2.5 mm ²
Housing material	PBT
Sensing face	PBT
Protection degree	IP67
General information	
Use in the hazardous area	see instruction manuals
Category	2G

Connection type:

NJ15-30GKM-N

Manual electrical apparatus for hazardous areas

for use in hazardous areas with gas, vapour and mist 94/9/EG EN 50014:1997, EN 50020:1994 Ignition protection "Intrinsic safety" Use is restricted to the following stated conditions $C \in 0.102$

⟨€x⟩ II 2G EEx ia IIC T6

PTB 00 ATEX 2048 X NJ 15-30GK...-N...

 \leq 140 nF ; a cable length of 10 m is considered.

 \leq 100 μH ; a cable length of 10 m is considered.

The apparatus has to be operated according to the appropriate data in the data sheet and in this instruction manual. The EU prototype test certificate must be observed. The special conditions must be adhered to!

Directive 94/9EG and hence also EU prototype test certificates apply in general only to the use of electrical apparatus under atmospheric conditions. The use in ambient temperatures of > 60 °C was tested with regard to hot surface the attraction of the attraction.

faces by the mentioned certification authority. If the equipment is not used under atmospheric conditions, a reduction of the permissible minimum ignition energies may have to be taken into consideration.

The temperature ranges, according to temperature class, are given in the EU prototype test certificate.

Laws and/or regulations and standards governing the use or intended usage goal must be observed. The intrinsic safety is only assured in connection with an appropriate related apparatus and according to the proof of intrinsic safety.

No changes can be made to apparatus, which are operated in hazardous areas. Repairs to these apparatus are not possible.

When used in the temperature range below -20°C the sensor should be protected from knocks by the provision of an additional housing.

Subject to reasonable modifications due to technical advances.
