Cable pull

Features

- **Direct length and position measurement**
- **High accuracy of measurement**
- **Simple installation**
- **Sturdy construction**
- **Long lifetime**

Description

The combination of a multiturn absolute rotary encoder and a cable pull is ideal for positioning applications where easy installation and low costs are required.

Pepperl+Fuchs cable pulls incorporate a high precision measuring drum with extremely robust spring return, around which a highly flexible stainless steel is wound. The rotary movement of the measuring drum is transferred to the flanged multiturn absolute rotary encoder via a play-free coupling.
