Dimensions

Technical Data General specifications

CE

Model Number

NJ40+U1+A2-3D

Features

- · Comfort series
- 40 mm not embeddable

Connection

Accessories

MHW 01 Mounting aid

Switching element function		PNP	Antiva
Rated operating distance	s _n	40 mm	ı
Installation		not em	beddab
Output polarity		DC	
Assured operating distance	sa	0 32	2.4 mm
Reduction factor r _{Al}		0.5	
Reduction factor r _{Cu}		0.45	
Reduction factor r _{V2A}		0.8	
Nominal ratings			
Operating voltage	UB	10 6	60 V
Switching frequency	f	0 10	00 Hz
Hysteresis	Н	1 10) typ. 5
Reverse polarity protection		protec	ted agai
Short-circuit protection		pulsing	3
Voltage drop	Ud	≤ 2.8 \	/
Operating current	۱ _L	0 20	00 mA
No-load supply current	I ₀	≤ 10 m	hΑ
Operating voltage display		LED, g	green
Indication of the switching state		LED, y	ellow
Standard conformity			
Standards		IEC / E	EN 6094
Ambient conditions			
Ambient temperature		-25	70 °C (2
Mechanical specifications			
Connection type		termin	al comp
Core cross-section		up to 2	2.5 mm ²
Housing material		PBT	
Sensing face		PBT	
Protection degree		IP67	
General information			
Use in the hazardous area		see ins	struction
Category		3D

ATEX 3D Instruction

Device category 3D	for use in hazardous areas with non-conducting combustible dust
Directive conformity	94/9/EG
Standard conformity	EN 50281-1-1
	Protection via housing
	CSE is restricted to the following stated conditions
Ex-identification	€ II 3D IP67 T 114 °C X
General	The apparatus has to be operated according to the appropriate data in the data sheet and in this instruction manual. The data stated in the data sheet are restricted by this operating instruction! The special conditions must be adhered to!
Installation, Comissioning	Laws and/or regulations and standards governing the use or intended usage goal must be observed.
Maintenance	No changes can be made to apparatus, which are operated in hazardous areas. Repairs to these apparatus are not possible.
[Fett]Special conditions	
Maximum operating current I_L	The maximum permissible load current must be restricted to the values given in the following list. High load currents and load short-circuits are not permitted.
Maximum operating voltage UBmax	The maximum permissible operating voltage UBmax must be restricted to the values given in the following list. Toleran- ces are not permitted.
Maximum heating (Temperature rise)	dependant of the load current I _L and the max. operating voltage U _{Bmax.} Information can be taken from the following list. The maximum surface temperature at maximum ambient temperature is given in the Ex identification of the apparatus.
at U _{Bmax} =60 V, I _L =200 mA	44 °C
at U _{Bmax} =60 V, I _L =100 mA	40 °C
at U _{Bmax} =60 V, I _L =50 mA	38 °C
at U _{Bmax} =30 V, I _L =200 mA	28 °C
at U _{Bmax} =30 V, I _L =100 mA	23 ℃
Plug connector	The plug connector must not be disconnected under voltage. The proximity switch is marked as follows: "DO NOT DIS- CONNECT UNDER VOLTAGE!" When the plug connector is disconnected the ingress of dirt into the inner areas (i.e. the areas, which are not accessible in the plugged-in condition) must be prevented.
Protection from mechanical danger	The sensor must not be mechanically damaged.
Electrostatic charging	Sliding contact discharges must be avoided.
Connections for external wire	Terminal connection: Minimum conductor cross-section: 0.5 mm ² , maximum conductor cross-section: 2.5 mm ² . The ends of the conductor must be provided with cable sleeves.
Lead insertion	The cable entry must be such, that no tension load or twist is applied to the cable

Manual electrical apparatus for hazardous areas

The cable entry must be such, that no tension load or twist is applied to the cable The protection category must be in accordance with EN 60529 and as stated in the data sheet. The cable entry must be designed so that there are no sharp edges to damage the cable and impair the level of protection of the sensor. The cable entry must be in accordance with the relevant European standard for industrial cable and lead entries. In addition, in the case of flexible leads, the points of entry of the cable must be rounded off over an angle of at least 75°, with a radius (R), which is at least one quarter of the maximum permissible cable diameter for the entry, but not greater than a case. 3 mm.
