Function

The VB14N-300 is a line scanner for 1D barcodes. It grants high reliability when reading difficult to detect 1D barcodes thanks to its high performance optics and the use of ACB™ reconstruction technology.

A function key and multiple LEDs on the reader assist you in setting parameters, teaching in barcodes and performing tests. In live mode, the LEDs provide information on the respective reading status.

The VB14N-300 can be networked with up to 32 readers among each other via a high speed connection. This enables faster and more efficient data acquisition without the need for an external Multiplexer.

Setting parameters is easy by means of PC software.
