General

The apparatus has to be operated according to the appropriate data in the data sheet and in this instruction manual.
The data stated in the data sheet are restricted by this operating instruction! The special conditions must be observed!

Installation, Commissioning

Laws and/or regulations and standards governing the use or intended usage goal must be observed.

Maintenance

No changes can be made to apparatus, which are operated in hazardous areas.

Repairs to these apparatus are not possible.

Special conditionsMaximum operating current I_L

The maximum permissible load current must be restricted to the values given in the following list. High load currents and load short-circuits are not permitted.

Maximum operating voltage U_{Bmax}

The maximum permissible operating voltage U_B max is restricted to the values in the following list. Tolerances are not permissible.

Maximum permissible ambient temperature T_{Umax}

dependant of the load current I_L and the max. operating voltage U_{Bmax} .
Information can be taken from the following list.

at $U_{Bmax}=30$ V, $I_L=200$ mA

43 °C (109.4 °F)

at $U_{Bmax}=30$ V, $I_L=100$ mA

50 °C (122 °F)

at $U_{Bmax}=30$ V, $I_L=50$ mA

53 °C (127.4 °F)

Protection from mechanical danger

The sensor must not be exposed to **ANY FORM** of mechanical danger.

Protection from UV light

The sensor and the connection cable must be protected from damaging UV-radiation. This can be achieved when the sensor is used in internal areas.

Electrostatic charging

Electrostatic charges must be avoided on the mechanical housing components. Dangerous electrostatic charges on the mechanical housing components can be avoided by incorporating these in the equipotential bonding.

Protection of the connection cable

The connection cable must be prevented from being subjected to tension and torsional loading.
