

Model Number

ODT-MAC400-ND-RD-MC

Stationary multicode read device for all common 1D, 2D and Pharmacodes at speeds of 6 m/s, angled line-of-sight, VGA resolution, Ethernet, RS 232

Features

- 30 scans per second
- VGA output
- Simple focussing via laser pointers
- Integrated error image memory
- 10 m/s motion speed

Function

The stationary reading device is an optical identification system for reading up to 26 several code symbology. With a powerful signal processor and optimized decoding algorithms, the device delivers extremely high reading speeds.

The configuration is easy and comfortable via the standard Ethernet interface using a standard web browser or via serial port.

The device is supported by an integrated laser pointer and the VGA video output. In addition, the device has an integrated error image memory.

Typical operative range of stationary readers are:

- Document handling
- Printing machines
- Identification in packaging and warehousing technology
- Detection of PCBs
