Model Number

PIR20/31 sw

Passive infrared motion sensor with terminal compartment

Features

- Door activation sensor ٠
- One of the smallest sensors for per-٠ son detection
- Reliable detection through change in • the thermal image from +/- 0.5 °C
- Accurate and seamless field adjust-• ment through aperture and zoom function
- Function only in case of movement ٠

Product information

The PIR20 passive infrared scanner enables problem-free detection of people. It detects movement as soon as the temperature differential between an object and its environment is greater than $\pm\,0.5^\circ\text{C}.$ The detection range can be accurately set by means of zoom adjustment and lens apertures.

The PIR20 detects people approaching as a door.

Electrical connection

Indicators/operating means

1	I	Housing cover	
2	2	Lens cover	
3	3	Zooming scale	
4	1	Zooming screw	
5	5	Sensitivity adjuster	
6	6 LED		
7	7 Switch active/passive

Technical data				
General specifications				
Effective detection range		max. 12 m (frontal)		
Detection field		max. 1800 mm x 2600 mm for a mounting height of 2500 mm		
Indicators/operating means				
Operating display		LED green		
Function display		LED red: illuminates upon detection		
Controls		Zoom screw for adjusting the detection field , sensitivity adjust- ment , changeover switch, active/passive		
Electrical specifications				
Operating voltage	UB	12 24 V AC / 12 30 V DC		
No-load supply current	I ₀	approx. 15 mA		
Power consumption	P ₀	approx. 350 mW at 24 V		
Output				
Switching type		Output active/passive, programmable		
Signal output		Relay, 1 alternator		
Switching voltage		48 V AC/DC		
Switching current		1 A		
Switching power		max. 30 W / 60 VA		
De-energized delay	t _{off}	0.5 s (preset)		
Ambient conditions				
Ambient temperature		-20 60 °C (-4 140 °F)		
Mechanical specifications				
Mounting height		recommended: max. 3.5 m		
Protection degree		IP52		
Connection		screw terminals, removable		
Material				
Housing		black ABS		
Optical face		plastic lens		
Mass		approx. 40 g		
Approvals and certificates				

CE conformity

yes

Curves/Diagrams

Typical applications

- Detection of movement by people
- Opening impulse sensor for people at • automatic doors
- Elevator entrance area monitoring •

Detection area

Accessories

Wetterschutzhaube PIR 20 Weather hood for series PIR20

Flush Mounting PIR20

Flush-mounted frame for sensors in the PIR20

AIR20/PIR20 Weather Cap

All-weather hood for AIR20 and PIR20 series sensors

Other suitable accessories can be found at www.pepperl-fuchs.com

2

Operating principle

The passive infrared scanner functions differently to most optical sensors — as a passive device. A passive device is not equipped with a transmitter element, but does feature a receiver element. The receiver reacts to heat emission in the form of infrared light transmitted by the human body. This infrared light is detected by a multi-part lens system (fresnel lens), which means that the intended detection range can be fully covered by the receiver. Within 20 seconds of switching on the sensor, the receiver measures and stores the infrared image identified. A switching signal is transmitted when two conditions have been met:

1. The temperature of the object to be detected deviates from the ambient temperature by at least $\pm 0.5^{\circ}$ C.

2. The object to be detected moves at a speed of at least 100 mm/sec.
