

Features

- 4-channel
- Outputs wired to Ex e terminals
- Installation in suitable enclosures in Zone 1 or Zone 21
- Analog output module for 0/4 mA ... 20 mA
- HART communication via field bus or service bus
- Simulation mode for service operations (forcing)
- Line fault detection (LFD)
- Output with watchdog
- Permanently self-monitoring

Function

The analog output drives positioners, proportional valves, I/P converters, or local indicators.

Open circuit line fault alarms are detected, depending on the parameter setting.

The outputs are galvanically isolated from the bus and the power supply (EN 60079-11).
